

# TABLE OF CONTENTS

Introduction to <i>Best Practices</i> for Compressed Air Systems.....	xi
Purpose of This Manual	
How to Use This Manual	
Summary of Best Practices.....	xiii
Summary of Key Points from Compressed Air Challenge®	
Training:.....	xv
“Fundamentals of Compressed Air Systems” and	
“Advanced Management of Compressed Air Systems”	
Frequently Asked Questions and <i>Best Practices</i> Manual	
Sources for Answers.....	xviii

## SECTIONS

Section 1.	The Demand Side—How to Analyze Existing and New Compressed Air Systems.....	1
Section 2.	The Supply Side—Compressor Room Equipment.....	9
Section 3.	Distribution System.....	47
Section 4.	End Uses.....	55
Section 5.	The System—Monitoring, Measuring, and Managing for Optimum Performance.....	65
Section 6.	Analyzing Existing Systems for Performance Improvements.....	81
Section 7.	Service and Solution Providers.....	87
Section 8.	How to Estimate Your Total Cost of Compressed Air.....	91
Section 9.	Maintenance and Safety.....	97
Section 10.	Resource Materials.....	103
Section 11.	Objectives of Attendees at CAC Training Workshops and System Problems Reported by Them and by Consultants.....	107

## Appendices

Appendix 1.A.1.	Typical Demand Profile Charts and Typical Uses of Compressed Air.....	111
Appendix 1.A.2.	Potentially Inappropriate Uses of Compressed Air.....	115
Appendix 1.A.3.	Air Requirements of Various Tools.....	117
Appendix 2.A.1.	Partial Pressure of Water Vapor at Various Temperatures.....	121
Appendix 2.A.2.	Air Compressor Types and Performances.....	123
Appendix 2.A.3.	Compressor Capacity Controls.....	143
Appendix 2.A.4.	Multiple Compressor Control.....	151
Appendix 2.A.5.	Sizing Cooling Towers.....	167
Appendix 2.A.6.	Heat Recovery.....	169
Appendix 2.A.7.	Compressor Room: Compressor Profile (Sheet 1), and Dryer and Filter Profile (Sheet 2).....	171
Appendix 2.A.8.	Compressed Air System Maintenance Basics....	173
Appendix 2.A.9.	Lubricant Carryover.....	183
Appendix 2.B.1.	Moisture Content of Saturated Air at Various Temperatures.....	185

<b>Appendix 2.B.2.</b>	How Do We Dry It? Types of Dryers.....	189
<b>Appendix 2.B.3.</b>	Dryer Correction Factors.....	197
<b>Appendix 2.B.4.</b>	Methods of Filtration.....	199
<b>Appendix 2.B.5.</b>	Air Quality Classes.....	203
<b>Appendix 3.A.1.</b>	Pressure Drop Due to Friction in 1,000 Feet of Pipe of Various Diameters and Loss of Air Pressure Through Screw Pipe Fittings.....	209
<b>Appendix 3.A.2.</b>	Economic Considerations in Pipe Size Selection.....	211
<b>Appendix 4.A.1.</b>	Pneumatic Cylinders and Valves.....	213
<b>Appendix 4.G.1.</b>	Pressure Drop in Hoses.....	219
<b>Appendix 5.A.1.</b>	Pressure Measurement Tools and Techniques.....	221
<b>Appendix 5.A.2.</b>	Typical Electric Motor Data Comparisons.....	225
<b>Appendix 5.D.1.</b>	Comparison of Transducers.....	227
<b>Appendix 5.E.1.</b>	Finding and Fixing Leaks and Establishing a Leak Prevention Program.....	229
<b>Appendix 5.F.1.</b>	Compressed Air System Storage.....	233
<b>Appendix 5.G.1.</b>	Reducing System Pressure and Pressure Drop.....	241
<b>Appendix 6.B.1.</b>	Detailed Overview of Levels of Analysis of Compressed Air System.....	245
<b>Appendix 6.B.2.</b>	Five Case Studies: Petroleum Packaging, Newspaper, Motor Assembly Plant, Publishing Facility, and Foundry.....	253
<b>Appendix 7.A.1.</b>	Guidelines for Selecting a Compressed Air System Service Provider.....	265
<b>Appendix 8.D.1.</b>	Life Cycle Cost Analysis.....	269
<b>Appendix 8.D.2.</b>	Guidelines and Financial Primer.....	271
<b>Appendix 8.D.3.</b>	Project Financial Alternatives.....	275
<b>Appendix 8.D.4.</b>	Selling Your Project to Management.....	282
<b>Appendix 9.G.1.</b>	Warning Decals.....	285
<b>Appendix 10.A.1.</b>	Glossary.....	291
<b>Appendix 10.A.2.</b>	Standards.....	301
<b>Appendix 10.B.1.</b>	CAGI Data Sheets.....	307

# LIST OF ILLUSTRATIONS

<b>Figure 1.</b>	Simplified Block Diagram of a Compressed Air System.....	xv
<b>Figure 2.</b>	Sample Compressed Air System Identifying Pressure Measurement Points Required to Develop a Pressure Profile.....	xvi
<b>Figure 2.1.</b>	Typical Arrangement of Bypass Piping and Valves to Allow Normal Rates of Flow During Maintenance.....	19
<b>Figure 2.2.</b>	Simplified Block Diagram of a Compressed Air System.....	45
<b>Figure 3.1.</b>	Distribution Piping Layout for a Square Plant.....	51
<b>Figure 3.2.</b>	Distribution Piping Layout for a Long, Narrow Plant.....	51
<b>Figure 3.3.</b>	Distribution Piping Layout for a Separated-Function Plant.....	51
<b>Figure 3.4.</b>	Typical 3-Valve Bypass System and Isolating Valve Location.....	53
<b>Figure 5.1.</b>	Sample Compressed Air System Showing Pressure Measurement Locations.....	73
<b>Figure 5.2.</b>	System Pressure Profile Example 1.....	73
<b>Figure 5.3.</b>	System pressure Profile Example 2.....	74
<b>Figure 5.4.</b>	Estimated Cost of Leaks, by Size.....	75
<b>Figure 6.1.</b>	Typical Components of Demand.....	82
<b>Figure 8.1.</b>	Costs of a Compressed Air System for a 10-Year Lifecycle.....	92

## Appendix Figures

<b>Figure A.2.a.</b>	Drawing of Piston and Valves on a Single-Acting Reciprocating Compressor.....	124
<b>Figure A.2.b.</b>	Cut-Away Drawing of a Two-Stage Single-Acting Air Cooled Compressor.....	125
<b>Figure A.2.c.</b>	Single-Acting Water-Cooled Compressor (Also Used for Booster Service).....	126
<b>Figure A.2.d.</b>	Unit-Type Compressor.....	127
<b>Figure A.2.e.</b>	Cut-Away of A Double-Acting Water Cooled Compressor.....	129
<b>Figure A.2.f.</b>	Drawing of A Horizontal Water Cooled Double-Acting Compressor.....	130
<b>Figure A.2.g.</b>	Lubricant Injected Rotary Screw Compressor (Also Referred to As The “Air End”).....	132
<b>Figure A.2.h.</b>	Compression Process in a Rotary Screw Compressor.....	133
<b>Figure A.2.i.</b>	Sliding Vane Compressor.....	135
<b>Figure A.2.j.</b>	Single Screw Compressor.....	137
<b>Figure A.2.k.</b>	Lubricant-Free Rotary Screw Compressor (Also Referred to as a “Dry Air Screw” Compressor).....	138
<b>Figure A.2.l.</b>	Operating Principle for a Scroll Compressor.....	139
<b>Figure A.2.m.</b>	Centrifugal Compressor Components.....	141
<b>Figure A.2.n.</b>	Centrifugal Compressor Performance.....	141
<b>Figure A.2.o.</b>	Effects of Receiver Size on Average Power vs. Percent Capacity of Lubricant Injected Rotary Screw Compressor with Load/Unload Capacity Control.....	144
<b>Figure A.2.p.</b>	Lubricant Injected Rotary Screw Compressor with Inlet Valve Modulation.....	145

<b>Figure A.2.q.</b>	Rotary Screw Compressor Performance with Variable Displacement.....	147
<b>Figure A.2.r.</b>	Variable Speed, Lubricant Injected Rotary Screw Compressor Package.....	148
<b>Figure A.2.s.</b>	Centrifugal Compressor Performance.....	149
<b>Figure A.2.t.</b>	Cascading Set Point Scheme.....	151
<b>Figure A.2.u.</b>	Single Set Point Diagram.....	152
<b>Figure A.2.v.</b>	Typical Layout of The Supply Side.....	153
<b>Figure A.2.w.</b>	Typical System Master Control.....	155
<b>Figure A.2.x.</b>	Example #1.....	156
<b>Figure A.2.y.</b>	Example #1 Set Points.....	157
<b>Figure A.2.z.</b>	Example #1b Set Points.....	159
<b>Figure A.2.a.a.</b>	Example #2.....	160
<b>Figure A.2.a.b.</b>	Example #2c Problematic Control Scheme.....	162
<b>Figure A.2.a.c.</b>	Example 2c Preferred Control Scheme.....	163
<b>Figure A.2.a.d.</b>	Example #3.....	164
<b>Figure A.2.a.e</b>	Example #3 Set Points.....	165
<b>Figure A.2.a.f.</b>	Schematic of a Typical Small-Capacity Refrigerated-Type Dryer.....	189
<b>Figure A.2.a.g.</b>	Schematic of a Regenerative Desiccant Pressure Swing-Type Dryer.....	191
<b>Figure A.2.a.h.</b>	Schematic of a Heat of Compression-Type Dryer (Single Drum).....	193
<b>Figure A.2.a.i.</b>	Schematic of a Deliquescent Desiccant-Type Dryer.....	194
<b>Figure A.2.a.j.</b>	Schematic of a Membrane-Type Dryer.....	195
<b>Figure A.2.a.k.</b>	Correction Factors for Refrigerated Dryers.....	197
<b>Figure A.2.a.l.</b>	Correction Factors for Regenerative Desiccant Dryers.....	198
<b>Figure A.2.a.m.</b>	The Filtration Process in a Coalescing Filter.....	199
<b>Figure A.2.a.n.</b>	Construction of a Typical Coalescing Compressed Air Filter Element.....	200
<b>Figure A.2.a.o.</b>	Typical Coalescing Filter.....	200
<b>Figure A.2.a.p.</b>	Typical Activated Carbon Filter Element.....	201
<b>Figure A.2.a.q.</b>	WG-1 Responsibilities.....	208
<b>Figure A.4.a.</b>	Block Diagram of Air Cylinder and Valve.....	213
<b>Figure A.5.a.</b>	Typical Pressure Measurement Locations.....	221
<b>Figure A.5.b.</b>	Data Logging with General Purpose Transducers.....	227
<b>Figure A.5.c.</b>	Data Logging with High Accuracy Pressure Transducers.....	228
<b>Figure A.5.d.</b>	Estimated Cost of Leaks, by Size.....	229
<b>Figure A.5.e.</b>	Effect of Receiver Size on Average Power vs. Capacity of Lubricant Injected Rotary Screw Compressor with Load/Unload Capacity Control.....	235
<b>Figure A.5.f.</b>	Lubricant Injected Rotary Screw Compressor Performance with Inlet Valve Modulation.....	236
<b>Figure A.5.g.</b>	Lubricant Injected Rotary Screw Compressor Performance with Variable Displacement.....	237
<b>Figure A.5.h.</b>	Variable Speed, Lubricant Injected Rotary Screw Compressor Package.....	238
<b>Figure A.8.a.</b>	Incremental Cash Flow Analysis.....	273
<b>Figure A.8.b.</b>	Project Financing through Self-Funding.....	277
<b>Figure A.8.c.</b>	Project Financing through Performance Contracting.....	278
<b>Figure A.8.d.</b>	Project Financing through Shared Savings Agreements.....	279
<b>Figure A.8.e.</b>	Project Financing through Outsourcing and Asset Management.....	280
<b>Figure A.11.a.</b>	CAGI Certification Seal and Label.....	307
<b>Figure A.11.b.</b>	Rotary Screw Compressor Data Sheet.....	308
<b>Figure A.11.c.</b>	Refrigerant Dryers Data Sheet.....	309

# LIST OF TABLES

<b>Table 1.1.</b>	Typical Auto Parts Manufacturers' Operations and Their Demands (cfm).....	3
<b>Table 2.1.</b>	Simple Matrix for Comparing Compressor Types.....	12
<b>Table 2.2.</b>	Nominal Air Receiver Sizes.....	39
<b>Table 7.1.</b>	Advantages and Disadvantages of Using In-House or Outside Contractor Personnel or a Combination of Both.....	89
<b>Table 11.1.</b>	Common or Frequently Recurring Compressed Air System Problems Reported by Consultants and <i>Best Practice Manual</i> Sources for Potential Solutions.....	108

## Appendix Tables

<b>Table A.1.a.</b>	Typical Demand Profile Chart.....	111
<b>Table A.1.b.</b>	Typical Mineral Processing Facility End Uses and Their Demands (cfm).....	112
<b>Table A.1.c.</b>	Potentially Inappropriate Uses of Compressed Air and Their Alternatives.....	115
<b>Table A.1.d.</b>	Air Requirements of Various Tools.....	117
<b>Table A.1.e.</b>	Typical Compressed Air Consumption in Sandblasting (cfm free air).....	118
<b>Table A.1.f.</b>	Discharge of Air Through an Orifice, by Diameter in Inches.....	118
<b>Table A.1.g.</b>	Volume of Compressed Air in Cubic Feet per Inch of Stroke to Operate an Air Cylinder.....	119
<b>Table A.2.a.</b>	Partial Pressure of Water Vapor at Various Temperatures.....	121
<b>Table A.2.b.</b>	Annual Lubricant Usage in Gallons for Various Levels of Carryover in Parts per Million (ppm).....	183
<b>Table A.2.c.</b>	Moisture Content of Saturated Air at Various Temperatures.....	185
<b>Table A.2.d.</b>	Moisture Content of Air in Gallons per 1,000 Cubic Feet.....	186
<b>Table A.2.e.</b>	Moisture Content of Saturated Air in Gallons per 1,000 Standard Cubic Feet.....	187
<b>Table A.2.f.</b>	Conversion Chart—Moisture Content of Air at Atmospheric Pressure.....	188
<b>Table A.2.g.</b>	Maximum Particle Size and Concentration of Solid Contaminants.....	203
<b>Table A.2.h.</b>	Maximum Pressure Dew Point.....	204
<b>Table A.2.i.</b>	Maximum Oil Content.....	204
<b>Table A.2.j.</b>	Maximum Oil Content.....	204
<b>Table A.2.k.</b>	Air Quality Class Typical Recommendations.....	206
<b>Table A.3.a.</b>	Pressure Drop Due to Friction in 1,000 Feet of Pipe of Various Diameters.....	209
<b>Table A.3.b.</b>	Loss of Air Pressure Through Screw Pipe Fittings.....	210
<b>Table A.3.c.</b>	Incremental Costs and Savings Associated With Using Various Pipe Diameters.....	212
<b>Table A.4.a.</b>	Flow Coefficients by Port Size.....	215
<b>Table A.4.b.</b>	Reference Table of Constants for Various Pressure Drops.....	217
<b>Table A.4.c.</b>	Pressure Drop (psi) in Hoses of Various Lengths and Diameters.....	219
<b>Table A.5.a.</b>	Typical Electric Motor Data Comparisons (Open Drip Proof - 460 Volt, 60 Hz, Nominal 1,800 rpm).....	225
